DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-15, in part, drawn to an isolated antibody that binds to a polypeptide at least 80% identical to SEQ ID NO: 6, monoclonal antibodies, antibody fragments, humanized or chimeric antibodies, and labeled antibodies, classified in class 530, subclass 387.1.
- II. Claims 1-15, in part, drawn to an isolated antibody that binds to a polypeptide at least 80% identical to SEQ ID NO: 7, monoclonal antibodies, antibody fragments, humanized or chimeric antibodies, and labeled antibodies, classified in class 530, subclass 387.1.
- III. Claims 1-15, in part, drawn to an isolated antibody that binds to a polypeptide at least 80% identical to SEQ ID NO: 8, monoclonal antibodies, antibody fragments, humanized or chimeric antibodies, and labeled antibodies, classified in class 530, subclass 387.1.
- IV. Claims 1-15, in part, drawn to an isolated antibody that binds to a polypeptide at least 80% identical to SEQ ID NO: 9, monoclonal antibodies, antibody fragments, humanized or chimeric antibodies, and labeled antibodies, classified in class 530, subclass 387.1.
- V. Claims 1-15, in part, drawn to an isolated antibody that binds to a polypeptide at least 80% identical to SEQ ID NO: 10, monoclonal antibodies, antibody fragments, humanized or chimeric antibodies, and labeled antibodies, classified in class 530, subclass 387.1.

The inventions are distinct, each from the other because of the following reasons:

Groups I-V are not related. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). Groups I-V are drawn to an antibodies that bind to polypeptides comprising SEQ ID NO: 6, 7, 8, 9 or 10, respectively. The polypeptides differ structurally and functionally, and thus the antibodies that bind to the polypeptides differ structurally and functionally and cannot be used together or interchangeably.

Because these inventions are distinct and/or unrelated for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the searches required for the different groups are different from each other, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
